5.2 Call Timing for Usage Sensitive Services

Where charges for a service are specified based on the duration of use, such as the duration of a telephone call, the following rules apply:

- 5.2.1** Calls are measured in durational increments identified for each service. All calls, which are fractions of a measurement increment, are rounded-up to the next whole unit.
- 5.2.2** Timing on completed calls begins when the call is answered by the called party. Answering is determined by hardware answer supervision in all cases where this signaling is provided by the terminating local carrier and any intermediate carrier(s).
- 5.2.3** Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.
- 5.2.4** Calls originating in one time period and terminating in another will be billed in proportion to the rates in effect during different segments of the call.
- 5.2.5** All times refer to local time.

SECTION 5.0 - NETWORK SERVICES DESCRIPTIONS (CONTINUED)

5.3 Distance Calculations

Where charges for a service are specified based upon distance, the following rules apply:

5.3.1 Distance between two points is measured as airline distance between the rate centers of the originating and terminating telephone lines. The rate center is a set of geographic coordinates, as referenced in Local Exchange Routing Guide issued by Bellcore, associated with each NPA-NXX combination (where NPA is the area code and NXX is the first three digits of a seven-digit telephone number). Where there is not telephone number associated with an access line on the Company's network (such as a dedicated 800 or WATS access line), the Company will apply the rate center of the Customer's main billing telephone number.

5.3.2 The airline distance between any two rate centers is determined as follows:

- Step 1: Obtain the "V" (vertical) and "H" (horizontal) coordinates for each Rate Center from the above-referenced Bellcore document.
- Step 2: Computer the difference between he "V" coordinate of the two rate centers; and the difference between the two "H" coordinates.
- Step 3: Square each difference obtained in step (b) above.
- Step 4: Add the square of the "V" difference and the square of the "H" difference obtained in step C) above.
- Step 5: Divide the sum of the squares by 10. Round to the next higher whole number if any fraction is obtained.
- Step 6: Obtain the square root of the whole number result obtained above. Round to the next higher whole number if any fraction is obtained. This is the airline mileage.

5.3.3 The formula for distance calculations is the square root of:

$$\frac{(V1 - V2)^2 + (H1 - H2)^2}{10}$$

- (1) Calls within the local calling exchange of the customer are based on airline mileage between the customers serving wire center and the wire center which serves the called telephone number. The method of computing this airline mileage is the same as used for long distance message telecommunications service but utilizes the V&H coordinates specific to the buildings housing the individual wire centers. The contiguous wire centers to the home wire center will always be included in the 0-10 mileage tier, even if one is beyond 10 miles.

Calls made to points outside the local calling exchange but within an Extended Area Service exchange will have distance computed in this manner except that the rate center V&H coordinates defined for long distance telecommunications service will be used rather than building V&H coordinates.

- (2) Initial minute rates are for connections of one minute or any fraction thereof.
- (3) All additional minute rates are for each additional minute or any fraction thereof that the connection continues beyond the initial period.

7.6 Direct Inward Dialing (DID) Service - Former Qwest Service Areas

Direct Inward Dialing (“DID”) permits calls incoming to a PBX system or other Customer Premises Equipment to be routed to a specific station without the assistance of an attendant. DID calls are routed directly to the station associated with the called number. DID service as offered by the Company provides the necessary trunks, telephone numbers, and out-pulsing of digits to enable DID service at a Customer’s location. DID service requires special PBX software and hardware not provided by the Company. Such hardware and software is the responsibility of the Customer.

These charges are in addition to recurring and non-recurring charges for PBX Trunks as shown in Section 7.5 of this tariff. The Customer will be charged for the number of DID numbers utilized out of the available 20 numbers.

	<u>Installation Charge</u>	<u>Monthly Recurring</u>
DID Trunk Termination: Per Trunk	\$85.00	\$26.31 (I)
Establish Trunk Group and Provide 20 DID Numbers	\$20.00	\$3.50

1. General

Customers within specified exchanges have the option of subscribing to the Community Plus Plan. The Community Plus Plan is offered to customers in the following exchanges:

Almelund
Delano
Lindstrom
Mayer
New Germany
Taylors Falls
Watertown

The Plan includes a monthly recurring charge and measures calling to the Metro Calling Plan Area exchanges only.

2. Regulations

- a. Existing customers in the specified Community Plus Plan exchanges may have the option to subscribe to the EAS Flat Rate service or select the Community Plus Plan service.
- b. All new customers moving into the specified Community Plus Plan exchanges may subscribe to the EAS Flat Rate service or select the Community Plus Plan service.
- c. The Plan is furnished only from central offices which have been arranged to provide this service, and is available to individual business access line customers.
- d. Customers may change from the EAS Flat Rate service to the Community Plus Plan or vice versa once within six months (180 days) of the date the Plan was initially offered or service has been established without paying a service charge. Appropriate service charges will apply to each change thereafter.
- e. The customer, on or off the same premises, may subscribe to EAS Flat Rate service and the Community Plus Plan if each service is provisioned on separate individual billing accounts. The intention of this regulation is to prohibit the provision of EAS Flat Rate service and the supplemental use of the Community Plus Plan on the same billing account (i.e., mixing both services on one account).

7.7.3 Usage Sensitive Charges and Allowances - Citizens-Frontier Service Areas (Continued)

(A) Community Plus Plan (Continued)

- f. Measured rate service, where applicable, provides for calling to specified areas with each call measured on a time-of-day and length-of-message basis.
- g. "0+" calls made to exchanges that were local or flat rate EAS prior to Community Plus Plan implementation will be billed at the local operator surcharge for the type of call being made.
- h. Community Plus Plan service will not be offered in connection with WATS, or Foreign Exchange services.
- j. For the purpose of determining charges, the following applies:
 - 1) A monthly rate for the provision of incoming calls and access to the local network.
 - 2) A charge per minute for the duration of a call. Monthly billing is based on cumulative minutes of usage.
 - 3) Chargeable time for all calls begins when connection is established between the calling line and the called line or branch exchange and ends when the calling line "hangs-up" thereby releasing the network connection. If the called line "hangs-up", but the calling line does not, chargeable time ends when the network connection is released either by automatic timing equipment in the telephone network or by the Company operator.

Direct Inward Dialing ("DID") permits calls incoming to a PBX system or other Customer Premises Equipment to be routed to a specific station without the assistance of an attendant. DID calls are routed directly to the station associated with the called number. DID service as offered by the Company provides the necessary trunks, telephone numbers, and out-pulsing of digits to enable DID service at a Customer's location. DID service requires special PBX software and hardware not provided by the Company. Such hardware and software is the responsibility of the Customer.

SECTION 11.0 - MISCELLANEOUS SERVICES

11.1 Carrier Presubscription

11.1.1 General

Carrier Presubscription is a procedure whereby a Customer designates to the Company the carrier which the Customer wishes to be the carrier of choice for intraLATA and interLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. Presubscription does not prevent a Customer who has presubscribed to an IntraLATA or InterLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative long distance carrier on a per call basis.

11.1.2 Presubscription Options - Customers may select the same carrier or separate carriers for intraLATA and interLATA long distance. The following options for long distance Presubscription are available:

- Option A:** Customer select the Company as the presubscribed carrier for IntraLATA and InterLATA toll calls subject to presubscription.
- Option B:** Customer may select the Company as the presubscribed carrier for IntraLATA calls subject to presubscription and some other carrier as the presubscribed carrier for interLATA toll calls subject to presubscription.
- Option C:** Customer may select a carrier other than the Company for intraLATA toll calls subject to presubscription and the Company for interLATA toll calls subject to presubscription.
- Option D:** Customer may select the carrier other than the Company for both intraLATA and interLATA toll calls subject to presubscription.
- Option E:** Customer may select two different carriers, neither being the Company for intraLATA and interLATA toll calls. One carrier to be the Customers' primary intraLATA interexchange carrier. The other carrier to be the Customer's primary interLATA interexchange carrier.
- Option F:** Customer may select a carrier other than the Company for no presubscribed carrier for intraLATA toll calls subject to presubscription which will require the Customer to dial a carrier access code to route all intraLATA toll calls to the carrier of choice for each call.

SECTION 11.0 - MISCELLANEOUS SERVICES (CONTINUED)

11.1 Carrier Presubscription, (Continued)

11.1.3 Rules and Regulations

Customers of record will retain their primary interexchange carrier(s) until they request that their dialing arrangements be changed.

Customers of record or new Customers may select either Options A, B, C, D, E or F for intraLATA Presubscription.

Customers may change their selected Option and/or presubscribed toll carrier at any time subject to charges specified in 11.1.5 below:

11.1.4 Presubscription Procedures

A new Customer will be asked to select intraLATA and interLATA toll carriers at the time the Customer places an order to establish local exchange service with the Company. The Company will process the Customer's order for service. All new Customers initial requests for intraLATA toll service presubscription shall be provided free of charge.

If a new Customer is unable to make selection at the time the new Customer places an order to establish local exchange service, the Company will read a random listing of all available intraLATA and interLATA carriers to aid the Customer in selection. If selection is still not possible, the Company will inform the Customer that he/she will be given 90 calendar days in which to inform the Company of his/her choice for primary toll carrier(s) free of charge. Until the Customer informs the Company of his/her choice of primary toll carrier, the Customer will not have access to long distance services on a presubscribed basis, but rather will be required to dial a carrier access code to route all toll calls to the carrier(s) of choice. Customers who inform the Company of a choice for toll carrier presubscription within the 90-day period will not be assessed a service charge for the initial Customer request.

Customers of record may initiate an intraLATA or interLATA presubscription change at any time, subject to the charges specified in 11.1.5 below. If a Customer of record inquires of the Company of the carriers available for toll presubscription, the Company will read a random listing of all available intraLATA carriers to aid the Customer in selection.

SECTION 11.0 - MISCELLANEOUS SERVICES (CONTINUED)
