## PRODUCT GUIDE FORMAT

- A. **Sheet Numbering** - Sheet numbers appear in the upper right corner of the sheet. Sheets are numbered sequentially. However, occasionally, when a new sheet is added between sheets already in effect, a decimal is added. For example, a new sheet added between Sheets 14 and 15 would be 14.1.
- B. **Sheet Revision Numbers** - Revision numbers also appear in the upper right corner of each sheet. These numbers are used to determine the most current sheet version. For example, the 4th revised Sheet 14 cancels the 3rd Revised Sheet 14. Consult the Check Sheet for the sheet currently in effect.
- C. **Paragraph Numbering Sequence** - There are four levels of paragraph coding. Each level of code is subservient to its next higher level:
- 2.
  - 2.1.
  - 2.1.1.
  - 2.1.1.1.
- D. **Check Sheets** - The Check Sheet lists the sheets contained in the Product Guide with a cross-reference to the current revision number. When new sheets are added, the Check Sheet is changed to reflect the revision. All revisions made in a given filing are designated by an asterisk (\*). There will be no other symbols used on this sheet if these are the only changes made to it (i.e., the format, etc., remains the same, just revised revision levels on some sheets). The Product Guide user should refer to the latest Check Sheet to find if a particular sheet is the most current sheet.
