

POTS Transformation

Digitally transform all voice and specialty phone lines.

As carriers are retiring analog voice infrastructure and support, costs are increasing year-over-year. It's clear that companies must find a path towards digital transformation. Moving voice and data services that traditionally require analog dial tone, such as alarms, elevator, fax, etc. is an especially daunting task. Now there's an alternative. MetTel's POTS Transformation provides a cost-effective and seamless transition to digital voice service.

Key Benefits

TURN-KEY DEPLOYMENT

- Managed equipment
- Nationwide, professional installation

4G WIRELESS BACKUP

- Business continuity, even during network outages

BEST CONNECTION & COVERAGE

The adapter connects to the internet via broadband, Wi-Fi and/or 4G LTE SIM.

Our device supports SIM cards from all major carriers (AT&T, Sprint/T-Mobile and Verizon).

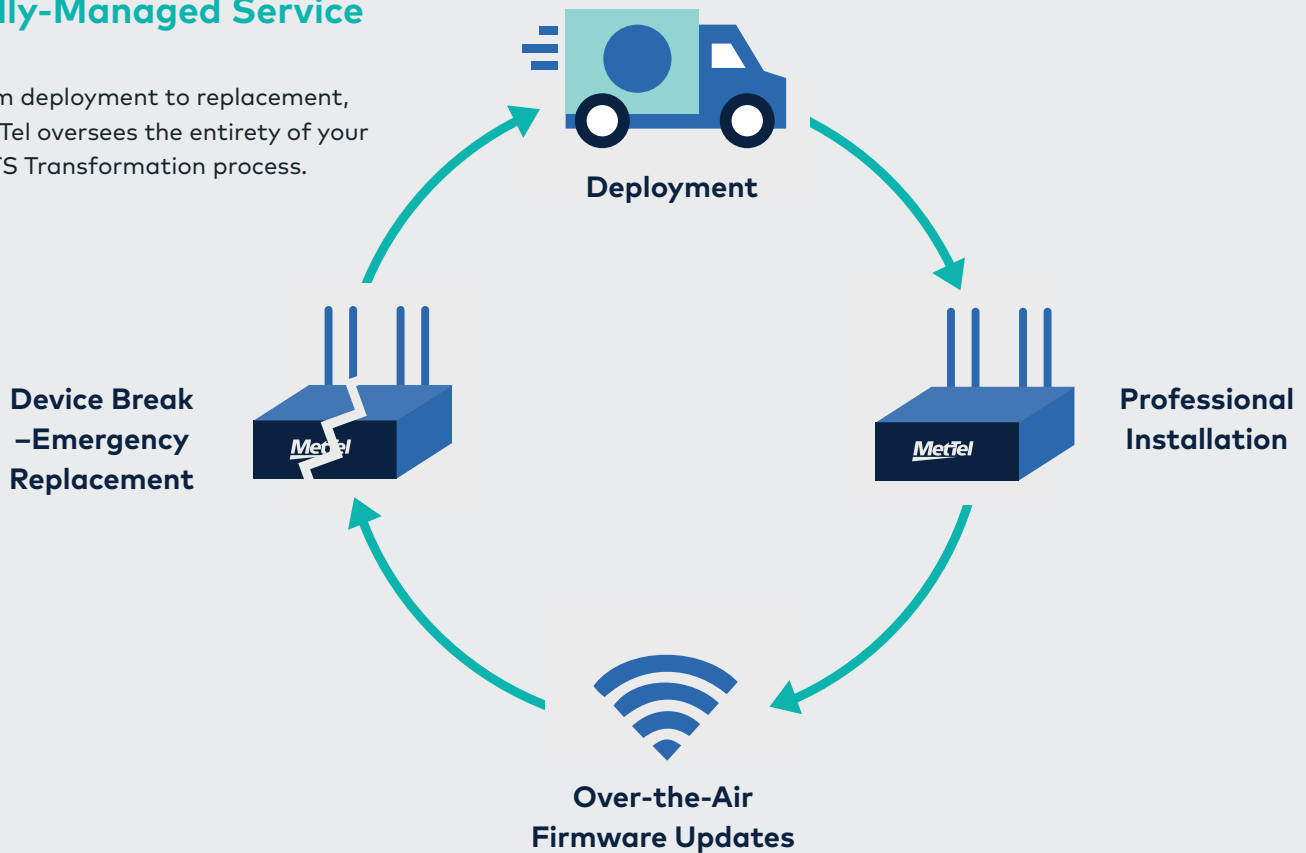

When bundled with MetTel mobility, POTS Transformation can be added to your cross-carrier pooling data allowance, which includes your connected desk phones.

**Estimated Cost Savings 30%
Immediate & Year-to-Year**

Fully-Managed Service

From deployment to replacement, MetTel oversees the entirety of your POTS Transformation process.

Technical Specs

CDS 9090

- Connect with Wi-Fi, broadband and/or 4G LTE
- Cellular can be the primary connectivity if Wi-Fi or broadband are not available, or act as a backup in the event of primary circuit failure
- The adapter can serve as a Wi-Fi access point
- With connection to 4G LTE cellular service, downtime is at the lowest possible level
- Dual SIMs provides added fail-over protection, perfect for 911 call completion assurance
- This device supports SIM cards from all major carriers (AT&T, Sprint/T-Mobile & Verizon)
- This device can handle up to 8 lines including voice, fax, elevator and alarm lines.
