Fleet Management School Buses & Vans

When safety and security is all that matters.

Whether public or private, K-12 or Higher Ed, the safety of students is paramount in the age we live in today. MetTel's fleet solutions for student transportation are built with redundant safety tools and resilient safeguard measures. We are working hard to secure the transportation of students at every step of the way.

Key Benefits

INCREASED STUDENT & DRIVER SAFETY

A monitored van or bus ride is a safe ride. Our solution includes driver score cards, two-way communication and green driving reports. Our tools let parents, students, and school transportation officials stay informed with live-streaming video, real-time alerts and notifications.

REDUCE BREAKDOWNS & CONTROL COSTS

Our solution includes preventative maintenance alerts, remote engine diagnostics, automated maintenance logs and reports. Stay informed with asset utilization reports and all fuel usage with idling and harsh driving alerts.

SCALABILITY

Open APIs available enabling customization and scalability.

Key Features

SAFETY & SECURITY

- Real-time, location-based service that shows exact stopping times from start to finish, assuring no children are left behind
- Interior and exterior video monitoring lessens bullying behavior and enhances driver safety
- Back-door open alerts with time and duration

DRIVER & VEHICLES PERFORMANCE

- Driver score cards show actual driver performance over time
- Driver vehicle inspection automation
- Vehicle maintenance automated tools
- Fuel consumption alerts

SECURED, USABLE DATA

- Encrypted, permanent and archived data via systems endorsed by the Department of Defense
- Sharable data is instantly available to law enforcement when time is critical
- Universal platforms integrate into school transportation management systems
- Onboard equipment is secured in tamper-proof hidden equipment

Ensure the Safety of your Students

Only real-time accountability of your school buses can provide the visibility needed to ensure the safest and most secure operations. All of our tools including multiple live video cameras are monitored in real time and offer built-in redundancy and connectivity to assure uptime.

Student Attendance

Assist your drivers in completing an internal roll call sweep to ensure no students are left behind.

Safe Stop & Transfinder Integration

Data is captured by the fleet tracker and is pushed into the third-party systems through open API.

Door & Stop-arm Sensor

Logs doors' status and the time/location where the stop-arm and lights are engaged.

Driver Vehicle Inspection Report

Helps streamline pre- and post-trip inspections and logs reports for audits.

Live Video Cameras

Assist your drivers in completing an internal roll call sweep to ensure no students are left behind.

Driver Panic Button

Allows a driver to quickly notify stakeholders of an onboard emergency.

Enhanced Communication

Instant communication with multiple drivers in the field from one platform.

GPS Fleet Tracker

Works on multiple LTE networks nationwide and captures vehicle location, engine hours, fuel consumption and data from additional sensors and inputs.

Make your school buses as safe and secure as possible.

We build the tools to help you achieve the highest safety rating and the most comforting security for the most precious cargo of all, school children. We're able to stay ahead of the competition by listening to school districts and universities around the country and giving them the reassurances that they need. Our goal is to make the daily operation of school buses and university transportation as safe and secure as possible for the students, the drivers and the other vehicles on the road. And, all MetTel's fleet tools are developed to save money on operations and maintenance costs.
