

SIP PRI

All of today's advanced services on your existing system.

Your legacy equipment can now be part of all of today's advanced telecom services. Our SIP PRI service offers all the benefits of VoIP while extending the usefulness of your current PBX system.

Key Benefits

EASY UPGRADE

No new equipment is required. Instantly take advantage of VoIP technology without buying a new telecom system.

EASY MANAGEMENT

You'll have control over your entire telecom system and assets with our communications management platform.

ONGOING SAVINGS

We offer the most competitive long distance and international rates on the market because of our powerful relationships with the nation's leading carriers.

CONNECTS ALL SYSTEMS

All your systems will seamlessly connect within our hybrid environment, including legacy PBX, SIP PRI, and even your new offices with Cloud PBX, especially when using TrueUC.

TRUEUC READY

Add MetTel's TrueUC, our unified communications platform, and get HD video, voice, messaging, screen sharing, SMS texting and conferencing in a single easy-to-use cloud application.

Features

FLEXIBILITY & SCALABILITY TOOLS

As your business changes, you can quickly add or remove PRIs to adapt to new requirements.

BACKUP & REDUNDANCY

Automatic IP rerouting capabilities provide practical geographic distribution of PSTN connectivity to sites with limited or network redundancy.

DISASTER RECOVERY & BUSINESS CONTINUITY

Quickly reestablish service in the event of any interruption including disasters via our automatic call rerouting to predefined locations. MetTel can quickly move users from an unrepairable PBX system by switching them from SIP PRI to our Cloud PBX and/or TrueUC.
