**SECTION 27- ISDN (Cont.)**

27.4 Features (Cont.)

27.4.2 Additional Basic Features for Customers with Four (4) or More B Channels

(A) Call Pickup. Enables a call ringing on any terminal of a call pickup group to be captured. This feature is only used for voice calls.

(B). Call Park. Provides the capability of holding calls and retrieving them from any station from the ISDN group by using a pick-up code.

(C) Group Intercom. Provides abbreviated dialing to members of a predesignated group. There are three (3) variations: automatic, one (1) digit, and two (2) digits.

27.4.3 Additional Features

(A) Additional Multiple Call Appearances-B Channels. Provides additional appearances of a station's directory number or secondary directory number on another instrument. These appearances may provide additional simultaneous access to the public network or may be limited to provide only one (1) additional access to the public network.

(B) 27 Port Conferencing for Flexible Calling. Enables up to twenty (20) additional individuals to the basic ten (10) way conference.

(C) Secondary Telephone Number-B Channels. Provides an additional directory number and a call appearance which is not physically terminated, but exists in the programming of circuit switched voice. The additional directory number, while not terminated on a dedicated facility, may be accessed from the network, and may originate unique outgoing dial tone from an instrument that has another directory number as its primary number.
