Fleet Management Solutions for Government

Revolutionize your fleet with IoT Single SIM technology.

The costs of fleet maintenance and government regulatory requirements for reporting and greenhouse gas (GHG) compliance are increasing. Outdated methods of management and documentation lack visibility into your fleet that creates inefficiencies in fuel usage, driving time, and overall expenses. Reduce the total cost of ownership and GHG emissions while improving citizen and employee safety with MetTel's Fleet Management solutions. We provide critical intelligence and deeper visibility into your fleet to help your agency streamline regulatory compliance and keep your fleet running at its best.

Benefits

REDUCE COSTS

Smarter asset utilization reduces overall mileage and fuel spend Predictive diagnostic technology notifies your agency of vehicle maintenance needs before they become costly fixes or replacements.

IMPROVE DRIVER SAFETY

Get in-vehicle coaching, risk and safety reports, instant notifications and accident detection with detailed secondby-second data to ensure the safety of your employees.

STREAMLINE COMPLIANCE & REPORTING

Configurable dashboard and reporting software with email automation eliminates the tedious process of manual reporting for government regulations and green-specific compliance, including GHG emissions, electric vehicle battery reporting, odometer readings and fuel economy.

BETTER UTILIZE FLEET INVENTORY

Get deeper visibility into the availability of your fleet to make data-based decisions about vehicle and driver utilization.

Features

IOT SINGLE SIM

MetTel's IoT Single SIM intelligently roams to find the best signal in any location, ensuring the best possible connectivity around the world. With over 650+ carriers in 150+ countries.
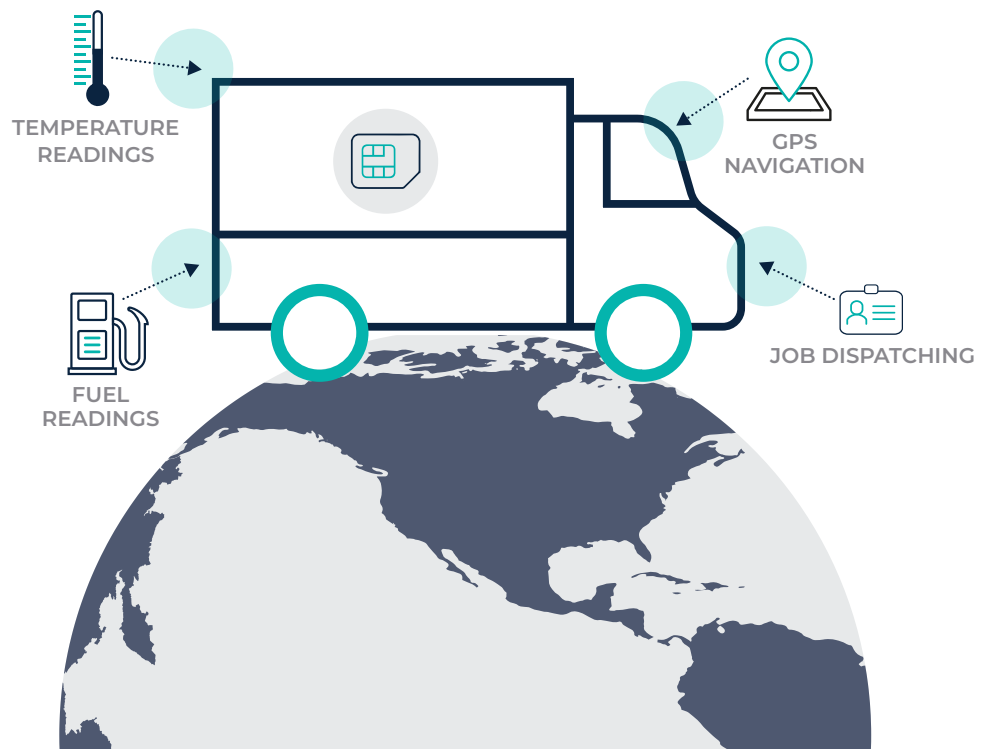

TAA COMPLIANT BUNDLED SOLUTIONS

We meet all TAA requirements by deploying a fleet solution that combines:

- Cellular data plan
- Web-based dashboard and reporting software
- API – software development kit
- Telematics GPS tracking Hardware
- Vehicle wiring harness.

ONE UNIVERSAL DEVICE

One device for all vehicle makes and models assures the possible outcome for your connected fleet management deployment.
