

MetTel[®]

MEDIK Mobile Emergency Data & Internet Kit

Connectivity when you need it most.

MetTel's POTS Transformation Emergency Kit provides first responders and other front-line crisis aids the ability to make calls via battery, outlet and WiFi. MEDIK provides a dial tone for days without power or the need for an outlet.

The KIT: Connection and Coverage

Multiple ways to connect: battery, outlet or WiFi

- Cellular as the primary connectivity if Wi-Fi or broadband are not available, or as a backup in the event of primary circuit failure
- The adapter can serve as a Wi-Fi access point
- With connection to 4G LTE cellular service, downtime is at the lowest possible level
- Device supports SIM cards from all major carriers
- Managed equipment and service by MetTel
 - AI-powered cloud monitoring & alerts
 - Remote firmware updates
 - Break/fix with emergency replacement
- Dual SIMs provide added failover protection
- MetTel is a managed facilities network (MFVN) operator and provides the VoIP gateway (SIP trunk)

Easy to use: if an outlet exists, simply plug in, pull out the antenna and power it on.

MEDIK in Action:

- Utilize the mobile device and internet kit for outbound calling as a backup or replacement to down phone lines.
- Provision the kit for alarms for security while the traditional phone line is being repaired.
- The kit provides LTE connectivity at temporary work sites.
