- 4.1.3 Timing terminates on all calls when the calling party hangs up or the Company's network receives an off-hook signal from the terminating carrier.

Business Local Calling Plan provides for calling to specified exchanges² with each call measured on a per minute and/or Block of Time basis.

Local Call Detail Billing is optional at rates specified following. Local Call Detail includes: date of call, telephone number called, time of call and number of minutes. Local Call Detail may be requested with the initial establishment of service. When requested subsequent to the establishment of the BLCP, the customer must request it at least 30 days prior to the period for which the detail is desired.

I. Usage Charges

Usage Charges for the Business Local Calling Plan are determined as follows:

Monthly billing is based on cumulative minutes of usage with the total fraction rounded to the next higher minute.

Chargeable time for all calls begins when connection is established between the calling line and the called line or branch exchange, and ends when the calling line "hangs-up" thereby releasing the network connection. If the called line "hangs-up", but the calling line does not, chargeable time ends when the network connection is released either by automatic timing equipment in the telephone network or by the Telephone Company operator.

Usage charges for the Basic Plan and Plus Plans are rated at \$.07 (7 cents) per minute for the measured exchanges. Usage charges of \$.07 (7 cents) per minute for the Premium Plan are applicable only if the customer exceeds the allotted Block of Time. The customer will only be charged for the minutes exceeding the allotment.

In order to recover the Company's expenses to comply with the FCC's pay telephone compensation plan effective on October 7, 1997 (FCC 97-371), an undiscountable per call charge is applicable to all intrastate calls that originate from any pay telephone, not presubscribed to the Company, used to access Company provided services. This surcharge, which is in addition to standard tariffed usage charges and any applicable service charges and surcharges associated with service, applies for the use of the instrument used to access Company provided service and is unrelated to the service accessed from the pay telephone.

Pay telephones include coin-operated and coinless phones owned by local telephone companies, independent companies and interexchange carriers. The Public Pay Telephone Surcharge applies to the initial completed call and any reoriginated call (e. g., using the "#" symbol). The Public Pay Telephone Surcharge does not apply to calls placed from pay telephones at which the Customer pays for service by inserting coins during the progress of the call.

Whenever possible, the Public Pay Telephone Surcharge will appear on the same invoice containing the usage charges for the surcharged call. In cases where proper pay telephone coding digits are not transmitted to the Company prior to completion of a call, the Public Pay Telephone Surcharge may be billed on a subsequent invoice after the Company has obtained information from a carrier that the originating station is an eligible pay telephone.

Per Line Blocking: When blocking is established on the line, it can be deactivated by dialing a code before each call. This one call unblock allows the name and/ or number to be sent for that one call only. Customers who choose per line blocking for the first time will not be charged the nonrecurring charge. After the first time, customers requesting per line blocking will pay a nonrecurring charge for each line equipped with per line blocking. SECTION 5.0 -MISCELLANEOUS SERVICES AND RATES (cont'd.)**5.11 Carrier Presubscription****5.11.1 General**

Carrier Presubscription is a procedure whereby a Customer designates to the Company the carrier which the Customer wishes to be the carrier of choice for intraLATA and interLATA toll calls. Such calls are automatically directed to the designated carrier, without the need to use carrier access codes or additional dialing to direct the call to the designated carrier. Presubscription does not prevent a Customer who has presubscribed to an IntraLATA or InterLATA toll carrier from using carrier access codes or additional dialing to direct calls to an alternative long distance carrier on a per call basis.

5.11.2 Presubscription Options -Customers may select the same carrier or separate carriers for intraLATA and interLATA long distance. The following options for long distance Presubscription are available:

Option A: Customer selects the Company as the presubscribed carrier for IntraLATA and InterLATA toll calls subject to presubscription.

Option B: Customer may select the Company as the presubscribed carrier for IntraLATA calls subject to presubscription and some other carrier as the presubscribed carrier for interLATA toll calls subject to presubscription.

Option C: Customer may select a carrier other than the Company for intraLATA toll calls subject to presubscription and the Company for interLATA toll calls subject to presubscription.

Option D: Customer may select the carrier other than the Company for both intraLATA and interLATA toll calls subject to presubscription

Option E: Customer may select two different carriers, neither being the Company for intraLATA and interLATA toll calls. One carrier to be the Customer's primary intraLATA interexchange carrier. The other carrier to be the Customer's primary interLATA interexchange carrier.

Option F: Customer may select a carrier other than the Company for no presubscribed carrier for intraLATA toll calls subject to presubscription which will require the Customer to dial a carrier access code to route all intraLATA toll calls to the carrier of choice for each call.

SECTION 5.0 -MISCELLANEOUS SERVICES AND RATES (cont'd.)**5.11 Carrier Presubscription** (Cont'd.)**5.11.3 Rules and Regulations**

Customers of record will retain their primary interexchange carrier (s) until they request that their dialing arrangements be changed.

Customers of record or new Customers may select either Options A, B, C, D, E or F for intraLATA Presubscription.

Customers may change their selected Option and/ or presubscribed toll carrier at any time subject to charges specified in 5.11.5 below:

5.11.4 Presubscription Procedures

A new Customer will be asked to select intraLATA and interLATA toll carriers at the time the Customer places an order to establish local exchange service with the Company. The Company will process the Customer's order for service. All new Customers' initial requests for intraLATA toll service presubscription shall be provided free of charge.

If a new Customer is unable to make selection at the time the new Customer places an order to establish local exchange service, the Company will read a random listing of all available intraLATA and interLATA carriers to aid the Customer in selection. If selection is still not possible, the Company will inform the Customer that he/ she will be given 90 calendar days in which to inform the Company of his/ her choice for primary toll carrier (s) free of charge. Until the Customer informs the Company of his/ her choice of primary toll carrier, the Customer will not have access to long distance services on a presubscribed basis, but rather will be required to dial a carrier access code to route all toll calls to the carrier (s) of choice. Customers who inform the Company of a choice for toll carrier presubscription within the 90 day period will not be assessed a service charge for the initial Customer request.

Customers of record may initiate a intraLATA or interLATA presubscription change at any time, subject to the charges specified in 5.11.5 below. If a Customer of record inquires of the Company of the carriers available for toll presubscription, the Company will read a random listing of all available intraLATA carriers to aid the Customer in selection.

SECTION 5.0 -MISCELLANEOUS SERVICES AND RATES (cont'd.)5.11 Carrier Presubscription (cont'd.)5.11.5 Presubscription ChargesA. Application of Charges

SECTION 7.0 -PRODUCT SERVICES (cont'd.)**7.4 Digital DS-1 PBX Service with Unlimited Local Calling and Bundled Toll/LD Service**

This service provides a trunk side DS1 electrical interface from the customer's digital PBX system to a MetPath™ digital port on a local Company switch for the origination and termination of calls. Traffic to and from the digital PBX can be received or dialed directly from any PBX station without the need for an attendant.

These digital trunks deliver a high-speed DS1 (T1) connection between your PBX and the Company network. There are up to 24 channels on one facility, each of which can be used to place or receive calls. This multi-channel capability dramatically reduces the need for additional PBX circuit cards.

Each of these products is offered under a 12, 24 or 36 month term agreement. Rates include unlimited local calling for sent-paid, directly dialed calls. Rates do not include calling card calls, information type calls to Time and Weather, 555, 700, 900, 976 Services, Directory Assistance or any other type of Operator Handled call.

The MetPath™ Digital DS-1 PBX Service with Unlimited Local Calling and Bundled Toll/LD Service Products are offered with six different increments of Toll/LD Minutes of Use: 5,000, 10,000, 15,000, 30,000, 50,000 and 100,000. Installation charges are included in the monthly recurring charges. Regional Toll and Long Distance Services must be PIC'd to the Company.
